## 2019-20 School Year

### 3rd Grade Elective Track Course Descriptions

#### **Strings:**

In Vista's 3rd grade beginning strings class students have the exciting opportunity to explore performance on the violin/viola/cello/bass. This class is an introduction to the string family. Third graders will learn the proper violin/viola/cello/bass set-up and bow hold, learn correct left and right hand technique. Students will learn the different parts of the violin/viola/cello/bass and bow and learn how to read the treble/alto/bass clef. There will be opportunities for performance. Students will be exposed to the positive energy and confidence building that music brings into their lives through study and performance and the academic benefits that come from learning a musical instrument. Vista will provide an instrument for each student to use at school but please know that, to insure the proper size for each student, especially viola/cello/bass, it is strongly suggested that rental of an instrument be considered for home practice as well, ensuring your child every opportunity to progress at a much faster rate. Research shows that when a child starts out with the "Right Sized" instrument, they are more likely to continue with that instrument for years to come. This class will prove to be a very real investment in your child's future in more ways than you can imagine! Welcome to Vista's String World!

#### **Dance/Theater:**

Children love to move. They need to move. They learn through engagement of whole self. The power of dance and theater education inherently promotes within students lifelong learning, complex learning, effective communication, compassion, aesthetic awareness, collaborations skills, responsible citizenship and career readiness. The purpose of this third grade dance/theater course is to focus on learning through movement that develops bodily skill and kinesthetic awareness. Through movement activities and dance technique, the student will develop an understanding of time, space, and energy. This class will also emphasize the creative process, development of artistic insight, and individual expression. Lastly, students will be introduced to how dance and theater fit into one's own life, the lives of others, and other historical and cultural perspectives that connect humanity.

## **Policy for Acceptable Use of Computers and Networks**

Vista School recognizes that communications and other new technologies are shifting the ways that information is accessed, communicated, and transferred by members of our society. These changes also alter instruction and student learning. The school supports access by staff and students to rich information resources, along with the development of appropriate skills to analyze, evaluate, and utilize such resources. Within the school, staff members and students are provided access to electronic information resources over a computer network, which is a part of Vista School. This computer network is supported by the Department of Education, and includes filtered access to the Internet.

Vista School currently provides access to a variety of information resources, including web based curriculum resources via the Internet. Vista School uses Internet filtering processes that are compliant with federal standards including the "Child and Internet Protection Act" (CIPA), and does everything possible to protect your children. These filters are designed and used to protect students (minors), teachers, and administrative staff from harmful material, abuse, and cyber-bullying websites, email, and viruses. Internet access (although filtered) may still lead to resources that may not have been properly screened by educators for use by students of various ages. Vista School cannot guarantee complete protection from inappropriate material. Furthermore, it is impossible for the school or content filter to reflect each individual or family's opinions of what constitutes "inappropriate material." Families should be aware that certain material accessible over public networks might contain items that are illegal, defamatory, inaccurate, or potentially offensive to some people. Vista School supports and respects each family's right to decide whether or not their child will have access to resources via the Internet. If a student mistakenly accesses "inappropriate material", he/she should immediately notify a school staff member.

Students must complete a safety-training course provided by Vista School before they can use the Internet each year. This course will educate minors about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyber-bullying awareness and response.

Use of school systems, including Internet use, email messages, and conferences are not considered private and may be monitored by school staff and subject to open records requests.

### **Computer Network / Internet Rules**

The purpose of the computer network is to further the learning of students in the school. Access to the computer network, and through its Internet resources, is given to students who agree to act in a considerate and responsible manner. Use of the computer network is a privilege, not a right. Access requires responsible and lawful use. Parental permission is required for students to have independent access to resources via the Internet. Responsible use means that everyone has a part:

1. Students are responsible for appropriate behavior on school computers and networks just as they are in a classroom or in a school hallway. General school rules for behavior apply. Specific guidelines for computer may also exist for individual classrooms or computer labs. If a student is in doubt about whether a computer related behavior is permitted, it is her/his responsibility to ask a teacher or other staff member. Students are also responsible for reporting improper use to a staff member.
  2. Parents and guardians are responsible for supervision of Internet use outside school, and for setting and conveying standards that their children should follow when using electronic resources.
  3. It is the responsibility of each user to employ the computer network in support of education and research consistent with the goals and objectives of Vista School.
